PROFESSIONAL EXPERIENCE IN COMPUTING

Computational Scientist

[Jan. 2020 - present]

National Centre for Atmospheric Science, Computational Modelling Services group, based at University of Reading Dept. of Meteorology

- Developing, optimising and providing user services for cf-python, an earth science data analysis library, and supporting packages, plus wider work promoting the CF Conventions standard, for example as a member of the official 'Information Management and Support' team.
- Engineering infrastructure and supporting workflows for ES-DOC (the Earth System Documentation project), with responsibility for the CMIP6 simulation machine and performance end-to-end workflow.
- Further ad-hoc work in **HPC and climate modelling support**.

Scientific Software Engineer

[Oct. 2017 - Nov. 2019]

Met Office, Modelling Infrastructure Support Systems team

Developing, maintaining and supporting users of the infrastructure systems cylc, rose and fcm used to configure and run scientific software for both operational forecasting and research. For example:

- implemented suite host selection and asymmetric cryptography in, and wrote a syntax lexer and software-checking utility for, cylc;
- converted the entire cylc documentation from raw ATEX to Sphinx;
- overhauled web applications, including porting a Python 2 rose utility utilising the cherrypy web framework to Python 3 and tornado;
- registered numerous bug reports, bug fixes, user requests, and ideas;
- co-delivered internal training courses and an internal update seminar.

FURTHER OPEN-SOURCE CONTRIBUTIONS...

...to those made as part of core work for employed roles. Only notable items are listed; for a full record see the GitHub user sadielbartholomew.

Reviewer for Journal of Open Source Software [June 2020+]

• Selected as reviewer for a number of submissions to the journal **JOSS**, providing feedback to see these through to publication.

Optimisation of the epidemiology model JUNE [Aug. - Oct. 2020]

- With a small team from NCAS, optimised the performance of a new epidemiology simulation, JUNE, as part of research into COVID-19.
- Collectively **produced an** $\mathcal{O}(100)$ **latency speedup** to the pre-alpha stage, receiving formal acknowledgement in the official release paper.

Annual completion of Hacktoberfest challenge [Oct. 2018+]

• Winner of prizes for three consecutive years for completing the DigitalOcean open-source initiative Hacktoberfest each October.

Open personal project: creativity with matplotlib

[2016+]

XML

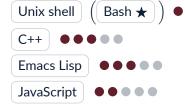

- OS: Linux ★ Windows
- Version control: git ★
- Development environment: emacs ★
- **PBS** Scheduling: | slurm cron
- Host: GitHub ★ GitLab **Bitbucket**
- Web technologies: CSS Vue.js
- Other notable: conda MPI SOL

TECHNICAL SKILLS

Key: **●** ability self-assessment | ★ preferred

PROGRAMMING LANGUAGES:

• Professional and/or academic use of: $\bullet \bullet \bullet \bullet \bullet \bullet$ (see also below \rightarrow) Python

Recreational use of, as well as the above:

→ notable Python ecosystem competence:

NumPy	SciPy	Dask	ma	atplotlib
Jupyter	Sphinx	mpi4p	ру	Numba
Airflow	Tornado	neto	netcdf4-python	

MARKUP LANGUAGES:

• Intermediate to advanced ability with: Markdown reStructuredText

Emacs Org-mode

YAML **HTML MTFX** INI • Basic proficiency with: TOML

INFRASTRUCTURE	VND	CVCTEMO
INFRASIRUCTURE	AIND	2121EM2

• Evolving an independent project, creative-matplotlib, showcasing expressive application of the Python visualisation library matplotlib.

PUBLICATIONS IN REFEREED JOURNALS

- Hassell, D. and Bartholomew, S. L., 2020, 'cfam: A Python reference implementation of the CF data model', published in Journal of Open Source Software [5(54), p.2717] (DOI: 10.21105/joss.02717)
- H. Oliver et al., 2019, 'Workflow Automation for Cycling Systems', published in Computing in Science & Engineering [21(4), pp.7-21] (DOI: 10.1109/MCSE.2019.2906593)

SELECTED DELIVERED PRESENTATIONS

- Independently devised and presented a software demonstration, 'Configuring Sphinx from scratch', as part of the Series of Online Research Software Events (SORSE) in November 2020.
- Co-presented a talk, 'Pursuing and supporting reproducible workflows for all with Cylc', at the Fourth Conference of Research Software Engineering ("RSEConUK 2019") in September 2019.

SIGNIFICANT TEACHING EXPERIENCE

- Led the second half of the Input/Output and Middleware (Storage II) session of the ESiWACE Summer School on Effective HPC for Climate and Weather, held August 2020 and due again for 2021.
- Co-delivery of the National Centre for Atmospheric Science's regularly-held day-long course on Python for atmospheric science, *Data Analysis Tools*, including leading the section about regridding.

OTHER NOTABLE WORK EXPERIENCE

Student Research Assistant Coltraco Ultrasonics Ltd

[Dec. 2015 - March 2017]

• Conducting scientific and technical research relating to ultrasonic measurement on a remote, part-time basis, assimilating into reports.

Science and Technology Editor
Palatinate Newspaper; The Bubble Magazine

[2014 - 2015; 2013 - 2014]

• Sourcing and writing articles to deadlines for two separate student publications, receiving the *Hunter Davies Prize for Journalism* in 2014.

EDUCATION

MPhys (Hons) Integrated Masters in Physics [Oct. 2012 - June 2017] **Durham University**

- Final-year computational project entitled 'Searches for boosted top quarks', evaluating and refining top-tagging algorithms implemented in C++, as applied to simulated LHC proton-proton scattering events.
- Undergraduate physics syllabus plus elective masters-level modules on Advanced Quantum Theory, Particle Theory and Cosmology.

Secondary Education
Ponteland Community High School

[2007 - 2012]

- A levels: Physics (A*), Chemistry (A*), Mathematics (A*), Further Mathematics (A), Critical Thinking (A)
- Other: Extended Project Qualification (A*), CREST Gold Award
- GCSE: 11 A* qualifications including French and self-taught History

SOFT SKILLS

Five soft skills to highlight:

Collaboration spanning time zones

End-user empathy | Creativity

Curiosity Continuous learning

ENGINEERING EXPERIENCE

Practiced in software engineering processes:

Software development life cycle stages

Use of Tier-1, -2 and -3 HPC facilities

Design patterns | User support

Peer review of code and written proposals

Documentation writing and infrastructure

Continuous integration

DevOps

PROFESSIONAL INTERESTS

High-performance computing Big data
Infrastructure relating to earth simulation
Metadata Workflows Open source
Data models Performant Python

OTHER INTERESTS

Art Reading Guitar Live music

Chess Walking Cycling Cookery
